JAVA ASSIGNMENT 6

```
package com.imcc.java;

interface Interf5 {
    void m2();
}

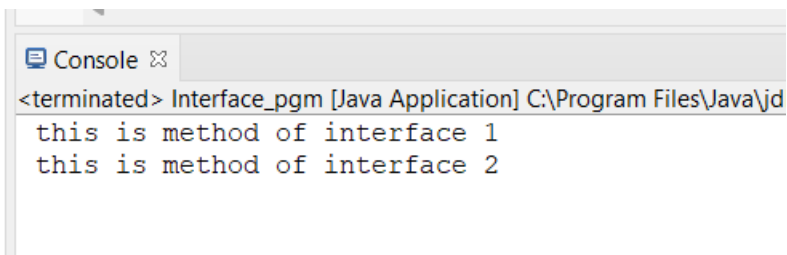

interface Interf6 {
    void m1();
}

class Child implements Interf5, Interf6 {
    public void m2() {
        System.out.println(" this is method of interface 1");
    }

    public void m1() {
        System.out.println(" this is method of interface 2");
    }
}

public class Interface_pgm extends Child {
    public static void main(String[] args) {
        Interface_pgm obj = new Interface_pgm();
        obj.m2();
        obj.m1();
    }
}
```

OUTPUT

A screenshot of a Java IDE's console window. The window title is "Console" with a close button. The text inside the console shows the execution of the program: "<terminated> Interface_pgm [Java Application] C:\Program Files\Java\jd" followed by two lines of output: "this is method of interface 1" and "this is method of interface 2".

```
<terminated> Interface_pgm [Java Application] C:\Program Files\Java\jd
this is method of interface 1
this is method of interface 2
```
