JAVA ASSIGNMENT 1

```java
/**
 * Assi1
 */
public class Assi1 {

    int var1 = 100;
    int var2 = 200;

    public static void method1() {
        Assi1 obj = new Assi1();
        System.out.println(obj.var1);
        System.out.println(obj.var2);
    }

    public static void method2() {
        Assi1 obj = new Assi1();
        System.out.println(obj.var1);
        System.out.println(obj.var2);
    }

    public static void main(String[] args) {
        Assi1.method1();
        Assi1.method2();
    }
}
```
